

AIM:

To learn how to create dashboards and stories in Tableau, design dashboards for different display devices, add interactivity, and publish visualizations for sharing and collaboration

TOOLS USED:

TABLEAU,INTERNET,EXCEL,GITHUB

PROCEDURE:

Open Tableau Desktop / Tableau Public on the system.

Load a sample dataset (Excel or CSV file).

Explore the dataset and verify fields and data types.

Create at least two worksheets using suitable charts.

Apply proper labels, titles, and color formatting.

Click New Dashboard from the bottom tab.

Drag the created worksheets into the dashboard area.

Arrange and resize charts for clear visualization.

Enable filters and apply filter actions between charts.

Add tooltips and highlight actions for interactivity.

Click New Story to create a data story.

Add dashboards or worksheets as story points.

Write captions to explain insights logically.

Use Device Preview to design for Desktop, Tablet, and Mobile views.

Save the workbook and publish it to Tableau Public or export as PDF/Image.

OBSERVATION:

Movies dominate Netflix content compared to TV Shows.

Around 68% of the total content consists of Movies, while TV Shows contribute 32%.

Content production shows a steady increase after 2015.

The highest number of titles were released between 2018 and 2020.

TV-MA is the most common rating, indicating mature content preference.

Documentaries and Stand-Up Comedy are among the top genres.

International movies and dramas contribute significantly to content diversity.

The United States leads in the total number of movies and shows.

Children and family content forms a smaller but consistent portion.

Overall, Netflix focuses more on movies with global and mature-audience appeal
